

OrcaCom's Mobile Roaming PBX

OrcaCom's hosted PBX allows mobile phones to connect directly to it over the internet. This means overseas travellers can eliminate expensive roaming costs by simply using a WiFi connection and making calls via their OrcaCom PBX.

Advantages:

- Calls back to NZ are free
- No costs associated with receiving a call
- Check your mobile voicemail for free
- Make calls to overseas destinations at 5c per min
- Your mobile is now treated as an extension and you can transfer calls just like you are at your desk in the office
- Enable call recording so you don't have to take notes while on the move
- No need to fire up your laptop to make use of a "softphone" or Skype
